

SHEET 1: IDEAS

INFO

Title: CS5044 P2
Author: 200030212
Date: 31/03/2021

FILTER

- ④ Some countries are both destination & origin
- ② Location more expressive as a map (1)

CATEGORISE

- ①②④
- ③⑦⑧
- ⑤⑥

COMBINE

- ⑦⑧ Bar chart can be stacked to show sources per country
- ①④ Number of reports can be encoded as size of route line

QUESTIONS

- where did reports come from?
- what was status of cheetah
- Where were they trafficked
- Which countries traded the most?
- Where they found at destination or origin?

and out

Focus

Route Map

● Origin

● Destination

• displaying a route map
of illegal cheetah trafficking

• displaying which region has
the most reports/incidents

INFO

Title: Location

Author: 190031409,
200030212

Date: 01.04.2021

Sheet Number: 2

OPERATION

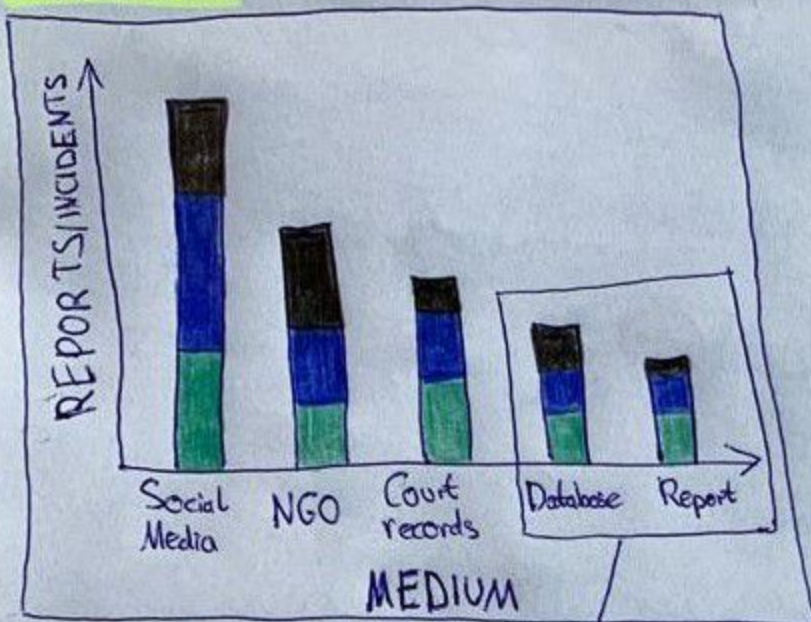

- Click on countries to see the origin and destination of illegal cheetah trafficking
- hover the bars, and get the number of reports/incidents
- the map can be zoomed in and out to focus on a certain area
- obtaining illegal cheetah trafficking linked to geolocation

DISCUSSION

- + Zoom provides flexibility towards the region
- + Views can be combined with other views

- countries might be the destination and origin of a cheetah for the same report/incident
- bars do not show the reports/incidents linked to countries

LAYOUT

- Source Reliability
- type A
 - type B
 - type C

Focus

- displaying mediums and its corresponding source reliability

INFO

Title: Sources

Author: 19003 1409,
200030212

Date: 01.04.2021

Sheet Number: 3

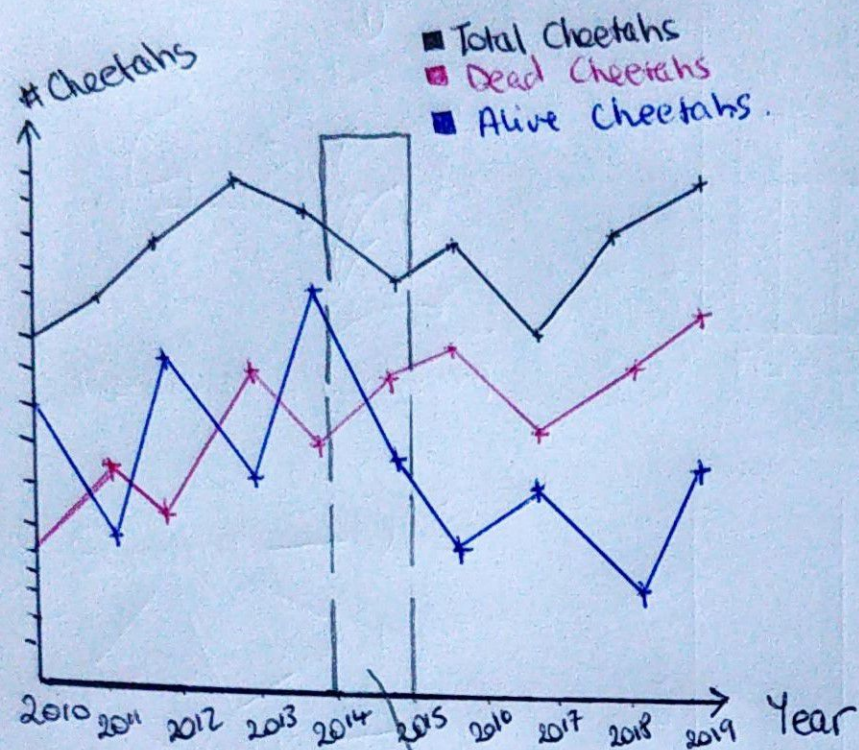

OPERATION

- hover the stacked bars and get the number of reports/incidents
- make the bars sortable in ascending or descending order
- obtaining information about the sources linked to illegal cheetah trafficking

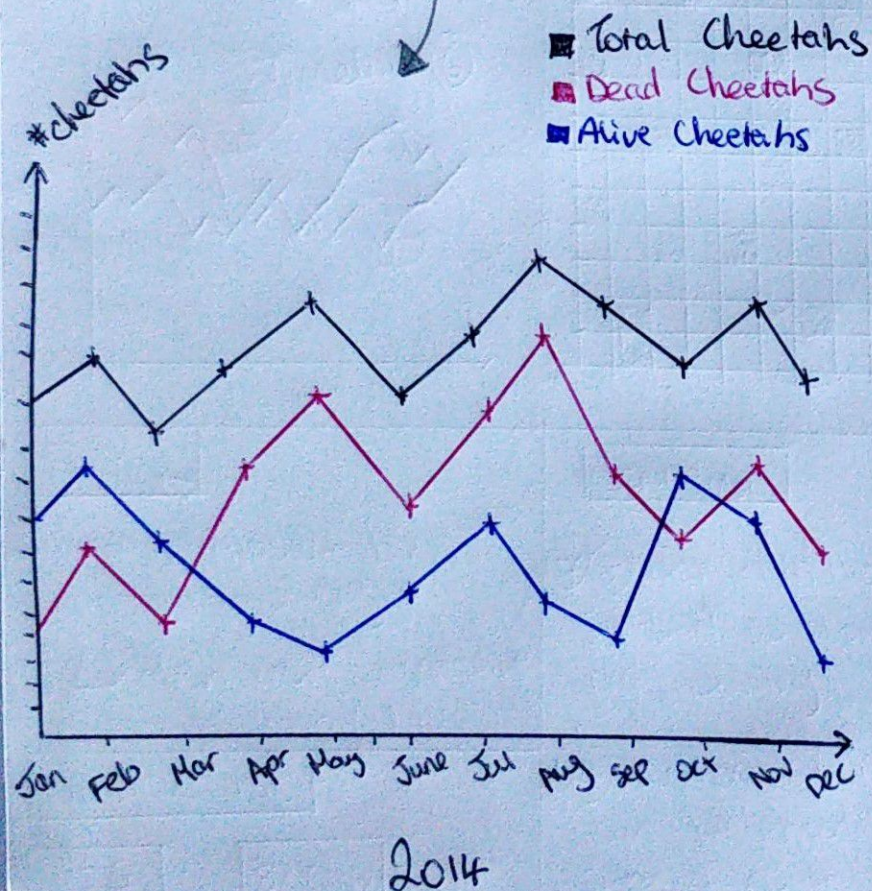

DISCUSSION

- + the total number of reports can be compared by mediums
- + the differences in source reliability can be compared between mediums
- + the stacked bar chart could be combined with information linked to location
- the classification of source reliability might not be reliable

LAYOUT

FOCUS

INFO

TITLE: CS5044 P2

AUTHORS: 200030212 / 190031409

DATE: 01/04/2021

SHEET: 4

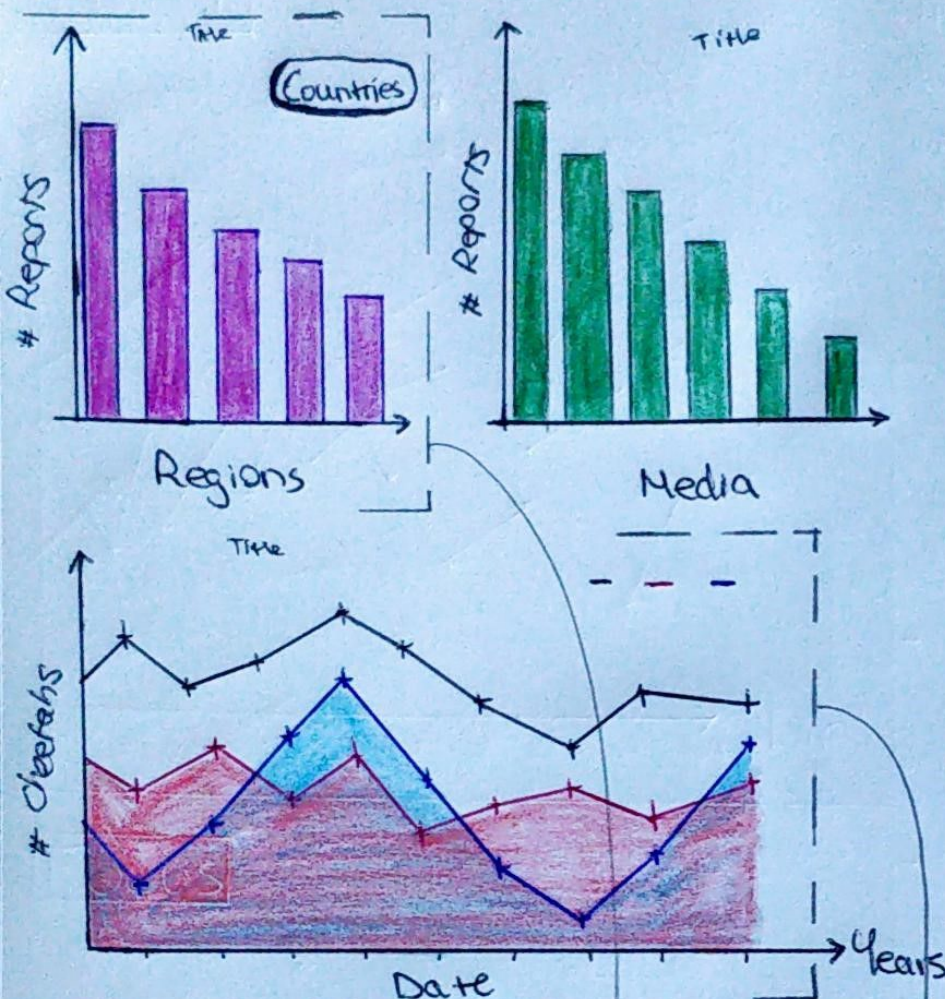

OPERATIONS

- Hover over Data Point to see exact amount of cheetahs
- Click and drag over the graph to zoom into a period
- Click on legend to show or hide the line

DISCUSSION

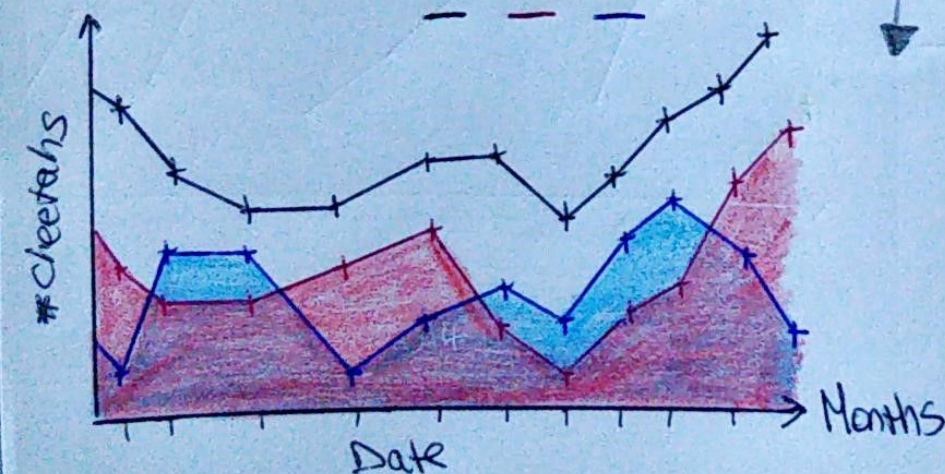

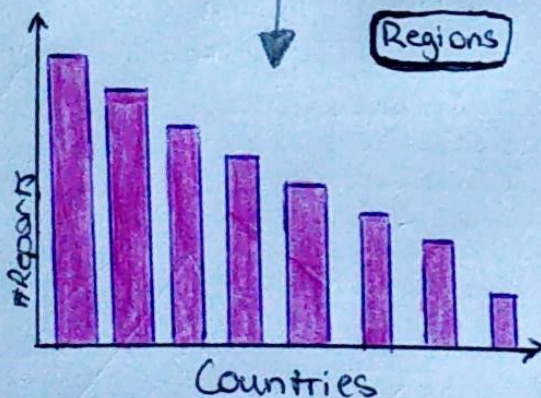

- + All data points can be plotted.
- + Zooming will help to see data more clearly & precisely
- Active and dead lines might not be easily comparable when all data points are clustered in the over view
→ change to area chart to immediately see comparison

LAYOUT

Focus

- Button to change graph

INFO

Title: CS5044 P2
 Authors: 200030212
 190031409
 Date: 01/04/2021
 Sheet: 5

OPERATIONS

- Hover on bars and data points for exact values
- Click on 'Countries' button to see # of reports per country
- Click and drag on timeline to zoom into period
- Click on legend to show/hide line/area

DETAILS

- Dependency: D3 v5
- Describing reports, locations & cheetah numbers
- 'Countries' bar chart can be presented circularly if there are too many countries
- Nesting must be done to find summary values.
